

# Digital Nursing:

## Enhancing the human touch through technology

Dr Theo Fotis PhD, MSc, FHEA

Principal Lecturer, School of Health Sciences, University of Brighton

### The Reality

Nursing recognises human touch as a fundamental human need which is perceived under threat due to **Rapid technological innovations which bombard healthcare practitioners**

### The Problem

Divide between humans and digital technologies is widening with potential impact on patient safety and the current academic curricula globally, are missing out on following the fast pace of these developments

**Suggested Solution**

### Digital Nursing

A workforce that will be able to bridge the gap between health care and innovation and reduce the patient-technology divide through skills of **Digital Safety, Digital Use, Digital Communication**

**How?**

### Education

**University of Brighton Postgraduate Module**

#### Clinical Digital Health

- **Current and emerging technologies**
- **Application of technologies**
- **Implications and dangers**
- **Future innovations**
